

Forara F01P/F01E User Guide

NOTICE

■ Notice

When you are traveling with a guitar, it is strongly recommended that you remove the Forara pickup unit. The adapter cable can be removed. The pickup has a certain weight. With the violent movement of the guitar, due to inertia, the pickup and guitar may shift or loose. It is possible to drop the pickup and drop it directly on some parts of the guitar to damage your guitar. Therefore, for safety, it is recommended that you remove the Forara pickup when traveling.

When the pickup is in use, feedback and howling may occur. The environmental conditions that trigger the feedback and howling may be complicated. The pickup and the amplifier system form a loop and generate feedback. The feedback coefficient is greater than or equal to 1, input and output. The phases are the same, and the sum of the phases is equal to an integer multiple of the input signal period. The entire system will generate self-excitation and cause howling. The guitar's sound hole will collect the echo and be picked up by the pickup. After picking it up, it will be sent to the sound to be amplified again. It is easy to meet the condition that the positive feedback magnification is greater than 1. When the acoustic environment reaches a phase that is an integer multiple of the period at a certain frequency, Feedback and howling will occur. Generally, the acoustic environment is fixed, so the frequency of feedback and howling can also be basically maintained. If the pickup does not have a howling suppression circuit, the most effective way is to reduce the positive feedback and turn down the volume. Or, do not point the guitar sound hole directly to the speaker of the audio. You can also use a special howling suppression device instead of a dedicated howling suppression device. Generally, the use of a simple howling suppression circuit will affect the sound quality. Generate feedback or howling. When feedback or howling occurs, it can be solved by using a special howling suppression device, or by reducing the volume of the sound reinforcement equipment or by not facing the sound hole of the guitar.

GUARANTEE

■ Warranty description

Consumers purchase products of the "YALAV ELECTRONICS" or "YALAV" brand through the official website or the designated distributor on the official website. Within 7 days from the date of purchase, the product has a product quality problem under normal operating conditions (non-human damage) Quality failure, without unauthorized dismantling, the product has been detected by YALAV technicians for normal use. The user can choose to return, exchange or repair based on the proof of purchase. • Warranty coverage

1. When the product is obviously damaged and scratched during transportation due to accidents, which affects normal use, the first time the user uses the obvious noise or abnormal sound due to faults and defects of Yara Precision Electronics products and Affects normal use.
2. Under normal operating conditions (non-human damage), the product has cracked casing or non-removable parts have fallen off.
3. The main body of the pickup solenoid coil (including the cable between the main unit of the pickup and the 3.5mm plug) is

• Non-warranty coverage

1. Man-made damage to the product.
2. The appearance of the product and the outer packaging box is not guaranteed.
3. Product parts are incomplete or missing after disassembly. Unauthorized disassembly of the product without permission,
4. illegal modification or repair of the internal structure or circuit of the product, etc.
5. The product is damaged by other chemical corrosion during use, other objects collide, scratch, etc.
6. The product contains consumable parts, such as batteries, stickers, or disposable accessories such as tapes with adhesive tapes, cable ties, etc.
7. The wearing parts of the product exceed the specified warranty period.

• Under the following circumstances, YALAV will refuse to provide free warranty service and provide paid repair services

1. Product damage caused by not following the instructions in the product manual.
2. Inevitable parts loss during frequent use of the product, such as batteries, stickers, or disposable accessories products such as with adhesive tape, cable tie, etc.
3. The battery's positive and negative terminals are connected in the opposite direction to cause damage to the product. Due to negligent use or irresistible, the product's connecting cables, plugs and sockets are damaged.
4. Cannot provide product purchase certificate and sales unit sales certificate, and products that have exceeded the warranty period. It does not belong to Yara Varitronix's official or official
5. designated dealers, but rather products purchased by Yara Varitronix through third-party channels.

• YALAV will refuse to provide repair services under the following conditions

1. Products that are not part of YALAV.
2. Cannot provide related purchase vouchers or products whose content does not match.
3. Dismantling the product without permission, illegally modifying or repairing the internal structure or circuit of the product.
4. The free warranty service provided by the product does not include the product manual and the accessories and packaging boxes indicated in the manual.
5. The user does not provide maintenance and transportation costs (including on-site service costs).

SUPPORT

■ Technical Support
