

Tiny T01P/T01E User Guide

NOTICE

■ **Notice:**

The Tiny pickup is an electromagnetic coil pickup. The output sound is good but the volume is low. Usually it needs to be connected to the preamp to use it. The pickup itself does not have a noise floor, but the electromagnetic coil will pick up electromagnetic signals in the surrounding environment and generate some noise. Normal Guitar speakers and sound cards may also have a large noise floor. If you directly connect ordinary guitar speakers or inferior sound cards and set the gain to a high value, the noise floor will be amplified as the gain is amplified, resulting in greater noise and affecting listening. This kind of noise belongs to speakers and sound cards, and has nothing to do with the quality of YALAV products. It is recommended that users buy high-quality guitar speakers or preamplifiers to use with pickups, or buy YALAV Used by Tiny.

When using the amplifier of the Tiny pickup tail, you need to change the 9V battery from time to time. Do not reverse the positive and negative poles when replacing the battery. The reverse connection lasts more than 10 seconds. After using or not using the guitar pickup for a long time, you need to unplug the guitar cable from the guitar tail to turn off the power of the pickup. Therefore, in order to extend the battery life, when not using the guitar pickup for a long time, please disconnect the guitar cable from The pickup tail nail is pulled out.

All other types of pickups may produce howling due to feedback. The pickup and feedback system constitute a loop to generate feedback. The feedback feedback is amplified again to generate howling. Common methods for suppressing howling are to reduce the volume. The guitar sound hole is facing away from the audio speakers, and a dedicated howling suppression device is used. It is not recommended that users use simple howling suppression equipment to eliminate howling. Simple howling suppression circuits will reduce bass quality. Tiny pickups use electromagnetic pickups. Acoustic pickup is generally not prone to feedback or howling. When generating feedback and howling, you can use special howling suppression equipment to suppress howling, you can also reduce the volume of the sound reinforcement equipment or turn the guitar sound hole back to the sound.

GUARANTEE

■ **Warranty description**

Consumers purchase YALAV ELECTRONICS products through the official website www.yalav.com or designated distributors on the official website. Within 7 days from the date of purchase, under normal operating conditions (non-artificial damage), the product has a quality problem or quality failure. Dismantling without permission, and tested by YALAV ELECTRONICS technical personnel, the product does have quality problems that seriously affect normal use. Users can choose to return, exchange or repair based on the purchase voucher. Within 15 days from the date of purchase, if there is a non-human fault, the user can choose to exchange or repair based on the purchase certificate. Returns, exchanges or repairs can be handled at the authorized dealer or by contacting the official website personnel when purchasing the product.

Consumers have not directly made a transaction with YALAV ELECTRONICS official website or a designated distributor on the official website to purchase YALAV ELECTRONICS products. They cannot directly participate in the returns, replacements and repairs provided by YALAV ELECTRONICS. Users need to purchase the products through Third-party companies consult and resolve issues.

• **Warranty coverage**

1. When the product is obviously damaged and scratched during transportation due to accidents, which affects normal use, the first time the user uses the obvious noise or abnormal sound due to faults and defects of Yara Precision Electronics products and Affects normal use.
2. Under normal operating conditions (non-human damage), the product has cracked casing or non-removable parts have fallen off.
3. The main body of the pickup solenoid coil (including the cable between the main unit of the pickup and the 3.5mm plug) is

• **Non-warranty coverage**

1. Man-made damage to the product.
2. The appearance of the product and the outer packaging box is not guaranteed.
3. Product parts are incomplete or missing after disassembly. Unauthorized disassembly of the product without permission,
4. illegal modification or repair of the internal structure or circuit of the product, etc.
5. The product is damaged by other chemical corrosion during use, other objects collide, scratch, etc.
6. The product contains consumable parts, such as batteries, stickers, or disposable accessories such as tapes with adhesive tapes, cable ties, etc.
7. The wearing parts of the product exceed the specified warranty period.

• **Under the following circumstances, YALAV will refuse to provide free warranty service and provide paid repair services**

1. Failure to follow the instructions in the product manual to damage the product.
2. The product has inevitable loss of parts in frequent use, such as batteries, adhesive stickers, or disposable accessories that are included with the product, such as buckles and cable ties.
3. The reverse connection of the battery's positive and negative poles leads to damage to the product, and due to negligent use or irresistible damage to its product cables, plugs and sockets.
4. Unable to provide product purchase certificate and sales unit sales certificate, and products that have exceeded the warranty period.
5. It does not belong to the directly generated transaction with the official dealer of YALAV ELECTRONICS, but the product of YALAV ELECTRONICS purchased through the third part.

• **YALAV will refuse to provide repair services under the following conditions**

1. Products that are not part of YALAV.
2. Cannot provide related purchase vouchers or products whose content does not match.
3. Dismantling the product without permission, illegally modifying or repairing the internal structure or circuit of the product.
4. The free warranty service provided by the product does not include the product manual and the accessories and packaging boxes indicated in the manual.
5. The user does not provide maintenance and transportation costs (including on-site service costs).

• **YALAV will refuse to provide repair services under the following conditions**

1. Products that are not part of YALAV.

2. Cannot provide related purchase vouchers or products whose content does not match.

3. Dismantling the product without permission, illegally modifying or repairing the internal structure or circuit of the product.

4. The free warranty service provided by the product does not include the product manual and the accessories and packaging boxes indicated in the manual.

5. The user does not provide maintenance and transportation costs (including on-site service costs).

6. The user does not provide maintenance and transportation costs (including on-site service costs).
